SOFTWARE DEVELOPER

TECHNICAL SKILLS

- MERN Developer
- C/C++
- Data Structure and Algorithms
- Networking
- Flutter
- Data Analysis
- Arduino/Raspberry pi
- Burp Suite
- API's

PROFESSIONAL EXPERIENCE

Flutter Developer | Sneaco — May 2024 - November 2024

- Developed and deployed a cross-platform laundry service application
- Implemented user-friendly interfaces and integrated payment systems
- Optimized app performance and user experience across iOS and Android platforms

Campus Organizer/Lead | Google Developer Group — August 2024 - December 2024

- Lead and manage a developer community of 800+ members
- Organize technical workshops, hackathons, and networking events
- Foster collaboration and knowledge sharing among community members

Freelancer | UpWork / Freelancer / Fiverr / Replit — November 2022 - Present

- Develop websites, applications, and AI solutions for diverse clients
- Implement full-stack solutions using MERN stack and Flutter
- Maintain strong client relationships and deliver projects on schedule

Full Stack Mobile Developer | Coral — May 2023 - November 2023

- Developed hybrid mobile applications using Flutter framework
- Integrated custom APIs and implemented cross-platform functionality
- Collaborated with team members to ensure seamless backend integration

Full Stack Web-Developer | Disha Creation — Jan 2022 - March 2022

- Developed frontend using React.js, TypeScript, and Material UI
- Implemented backend solutions using Firebase
- Managed codebase and ensured optimal performance

EDUCATION

Eklavya International Academy | Science Maths | Jaipur — March 2019 - April 2021

B.Tech | Computer Science Engineering | JK Lakshmipat University — August 2021

PROJECTS

Indian Sign Language Conversations System | ML Project — August 2023 - November 2024

- This ML project develops a system for translating Indian Sign Language into text or speech, utilizing image processing, NLP, and ML techniques. Created our own dataset available on kaggle and got 75% accuracy.

CDMArena: Dynamic MERN-Based Platform for Device Specs & Tech News | MERN — June 2024

- Developed TechSpecs Hub, a dynamic MERN-based platform for mobile and computer specs and tech news. Implemented a comprehensive database with MongoDB and a responsive React frontend.

Imagination - Ai Photo Editor | MERN — May 2024

- Developed an AI Photo Editor where user can change the clothes styling of hair and you can make all changes using help of Ai.

Custom Automated App for Students and Developers | Flutter — March 2024

- This Flutter app aims to streamline student and developer workflows by automating tasks like to-do lists, WhatsApp interactions, and note-taking.

Jigyasa Web-Development and Flutter App — June 2022

- This React application aims to be a knowledge-sharing hub, connecting users with companies and organizations, while analyzing user data to provide personalized recommendations.

AWARDS / CERTIFICATES / ACHIEVEMENT

- CCNA v7 - Introduction to Networks
- CCNA v7 - Switching and Routing
- CodeChef 4 Star
- German / Deutsch - A1, A2 and B1 - Goethe Institute
- Full Stack Mobile Development - udemy
- Full Stack Web Development - udemy
